ROSTA DIGITAL

Based on our almost **80 years of experience** in the field of **vibration and oscillation technology**, we have developed an **independent digital solution** that allows you to **project our know-how onto your screening machine**. We are proud to introduce **ROSTA DIGITAL**. The easy way to optimize your machines.

Our Digital Services

Powerful Sensor

- Wireless sensors
- Ideal for harsh environments
- Fits most machines
- Extra-long battery life option available

Digital Dashboard

- Secure and user-friendly online platform
- Intuitive data visualization
- Enabled fault diagnosis
- Thresholds and alerting fitted to your application

Vibration Analyst Service

- One point of contact
- Regular data reviews
- Findings include improvements
- Machine potential is optimized

your Benefit:

ROSTA DIGITAL is an **integrated, ready-made sensor data aggregation and processing solution** that already helps our customers to **increase the efficiency of their vibration processes and plants**.

How does it work:

The sensors positioned on the machine deliver the measured data to the dashboard. The dashboard displays relevant machine data and serves as a communication and alarming tool for our Vibration Analyst Service. The displayed values include stroke, stroke angle, acceleration, temperature, and lateral deviation.

A solution for everybody.

ROSTA DIGITAL has been developed to **monitor and analyze screens and sifters** as a first step.

Our solution **supports operators and end users** to maintain and **improve the efficiency** of their **production processes**.

If you are an **OEM**, we have a specific solution for you. Please contact us to find out more.
